Subject: Leg Scoping

Tower Designation: Site Name: *Slide Mountain*

Engineering Firm Designation: TEP Number: 79179.126927

Site Data: New Washoe City, NV 89704
Latitude 39° 18' 52.4", Longitude -119° 53' 03.0"
123 Foot – Self Support Tower

Tower Engineering Professionals, Inc. is pleased to submit this “**Leg Scoping Report**” to Overland Contracting Inc. The inspection was completed on August 7th–10th, 2017.

During the inspection, TEP installed 1/2" ø weep holes and ran a fiber optic camera throughout the tower legs. Leg thickness was measured every foot with an ultrasonic thickness gauge (UT). This process is limited by areas where the UT is used, and the effect of RF on electronic equipment. The UT used at this site was a Dakota Ultrasonics MX-3. For the purpose of this inspection, the tower legs were named by letter according to the magnetic azimuth defined by a line from the center of tower to the leg. “A” leg is the leg closest to magnetic north, followed clockwise by “B” and “C.” A-leg’s azimuth was ~30 degrees. The results were as follows:

- Minor corrosion was observed inside the legs in three locations.
- Water was observed and drained from the legs in three locations.
- A split leg was observed at the bottom of Section 5 C Leg.
- The tower was observed to be 123-ft. instead of the 120-ft. specified in the drawings

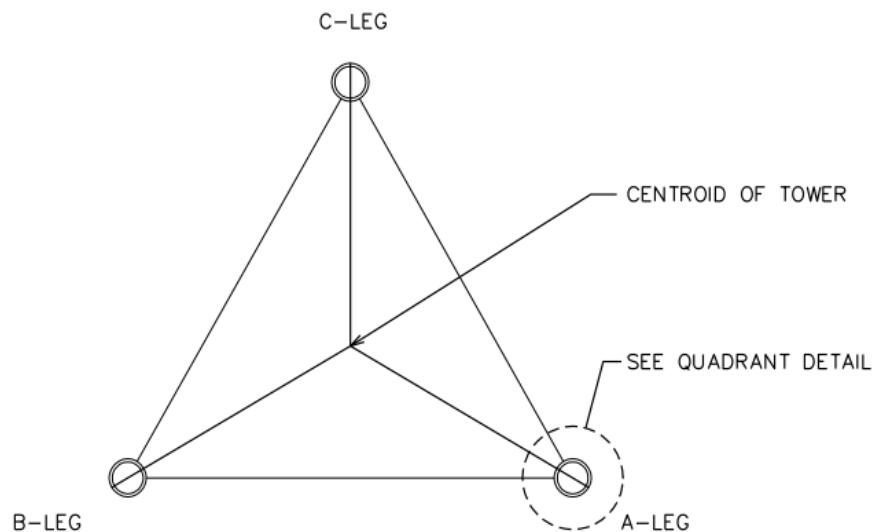

Locations and details of these issues are listed in the executive summary.

We at Tower Engineering Professionals, Inc. appreciate the opportunity of providing our continuing professional services to you and Overland Contracting Inc. If you have any questions or need further assistance on this or any other projects, please give us a call.

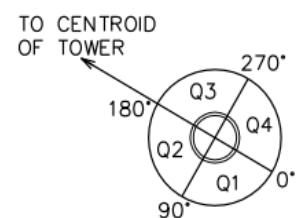

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Jason Chestnutt".

Jason Chestnutt, EI

QUADRANT DETAIL

EXECUTIVE SUMMARY

Photograph	Observations and Recommendations
 <p>12:55 PM 08/08/2017</p>	<p>Item 1</p> <p>Observation: Minor corrosion was observed in the legs at the following locations:</p> <ul style="list-style-type: none">• Section 4, A leg, ~65 ft.• Section 5, B leg, ~85 ft.• Section 5, C leg, ~80-84 ft. <p>All other areas of the tower were observed with little or no corrosion.</p> <p>Recommendation: Monitor the legs to ensure that present corrosion does not progress. In the event that present corrosion becomes problematic, remedial action will be required.</p>

 <p>10:45 AM 08/08/2017</p>	

EXECUTIVE SUMMARY

Photograph	Observations and Recommendations
 08/08/2017 10:37	<p>Item 2</p> <p>Observation: Water was observed and drained from the leg in the following locations:</p> <ul style="list-style-type: none">• Section 4, A leg• Section 4, B leg• Section 5, B leg <p>Recommendation: Ensure that proper drainage is maintained to prevent possible damage to the leg.</p>
 08/08/2017 10:53	
 08/08/2017 12:00	

EXECUTIVE SUMMARY

Photograph	Observations and Recommendations
 08/10/2017 10:23	<p>Item 3</p> <p>Observation: ½" weep holes were installed in the bottom of all sections. Weep holes were observed to be previously existing at the bottom of Section 3-A and Section 5-C.</p> <p>Recommendation: Monitor the weep holes to ensure proper drainage.</p>
 08/10/2017 14:57	
 08/10/2017 17:05	

EXECUTIVE SUMMARY

Photograph	Observations and Recommendations
 <p>Item 4</p> <p>Observation: A split leg was observed at 80' 8-1/4" to 81' 1" C Leg. The split is 3/8" at the widest point.</p> <p>Recommendation: A professional engineer licensed in the state of Nevada should review the capacity of the leg and design a modification if necessary.</p>	

EXECUTIVE SUMMARY

Photograph	Observations and Recommendations
	<p>Item 5</p> <p>Observation: UT measurements were taken at 1 foot intervals throughout the tower. See Appendix A for results.</p> <p>Recommendation: No further action required.</p>
	<p>Item 6</p> <p>Observation: A sheared off leg was observed at the top of tower on the B leg.</p> <p>Recommendation: A licensed engineer in the state of Nevada should review the capacity for the leg and design a modification to cap the leg.</p>
	<p>Item 7</p> <p>Observation: Chipped grout was observed at the bottom of Section 1-C.</p> <p>Recommendation: A licensed engineer in the state of Nevada should review the capacity in this area and design a modification if necessary.</p>
