Network Objectives

- Assist counties and local fire protection districts with wildfire education, CWPP planning, and securing grant funding for wildfire prevention, education, and mitigation.
- Educate communities, residents, and community organizations about the wildland fire threat and Fire Adapted Communities
- Connect Network communities with resources to complete CWPPs, prioritized project lists, and funding opportunities.
- Ensure resilient landscapes are being managed in conjunction with Fire Adapted Community concepts

Community Protection

Well-designed fuelbreaks and safe areas protect the community.

Space per managem

Defensible

Proper management of vegetation surrounding the home reduces the wildfire threat.

Access

Good access helps emergency responders arrive in a timely manner.

Evacuation

Prepared communities can evacuate safely and effectively.

Built Environment

Appropriate home construction and maintenance resists ignition.
