VOLUNTEER APPLICATION: Animal Services Advisory Board

Application for Animal Services Advisory Board

Additional Information:

I am applying for this position because I care deeply about animals and the people who own/use/keep them, as well as wildlife. Being heavily involved in a zoo, I have knowledge of, and access to resources concerning a wide range of different kinds of animals, besides the animals I specialize in. Although not a real estate professional by trade, I do have experience with real estate issues in a related area, and that is communications systems and towers. These systems often create issues involving property value, public safety, nuisances and aesthetics. I've been on both sides of the fence in these areas, applying for permits for such systems, and testifying on behalf of others who desire such systems as a subject matter expert. In the case of animals, I served on the former Animal Control Board for two years, and many of the cases brought before this board involved property issues. I also have a good understanding of geography, cartology and other skills needed to effectively deal with animal issues involving real property.
