Description of Project: The project is a hazardous fuels reduction project on 116.2 acres of private land, owned by Arrowcreek Homeowner Association (ACHOA) and Club at Arrowcreek golf club. The areas were selected based on the Community Wildfire Protection Plan (CWPP) and recent surveys as parcels with heavy fuel loading and strategically located to break fuel continuity from the wildland to the urban interface. All proposed work activities will be completed by Truckee Meadows Fire Protection District (TMFPD) Fuels Division Staff and equipment (\$284,220). Match will come from a combination of TMFPD equipment use and additional acres treated by ACHOA (\$52,000).	

NEVADA DIVISION OF FORESTRY

Educational events are programmed into preliminary activities to provide awareness to the community of fuels reduction efforts. All necessary historical and environmental clearances will be obtained during community outreach prior to implementation.

Fuel reduction work will consist of a 50-75% reduction in native brush fuel loading on the areas selected from the CWPP. The adjoining areas span both property owners, ACHOA and The Club at Arrowcreek. Parcels owned by the golf club, generally, have maintained grass in tee-boxes and fairways but surrounded by dense brush. By thinning the brush surrounding the golf courses as well as the connecting ACHOA land, the continuity through the community is interrupted. The prescription to remove decadent brush, selecting for dead or unhealthy plants, reduces overall flame length and spread from potential wildland fires. Material will be chipped or masticated back on-site either via tracked chipper, wheeled chipper or mastication implement. This reduces regeneration, protects soil, and improves water retention.

After the fuels reduction effort, this project intends to provide longer-term sustainability by monitoring for noxious weed invasion. If indicated by either observed germination or sprouting on more than 25% of treated areas, TMFPD will provide a pre-emergent herbicide application to neutralize potential existing seed bank. A long-term sustainability agreement with landowners will incorporate revegetation with fire-resistant grasses and forbs.

Deliverables, reporting requirements and due dates:

The work outlined above will be completed over a 3-year period beginning date that the State Forester signs subaward agreement and ending September 30, 2028. Truckee Meadows Fire Protection District will provide to Nevada Division of Forestry (NDF) quarterly performance reports for the previous quarter, beginning on 12/31/2025 and continuing through the life of the sub-award. The quarterly performance reports will include:

- Status Summary including planning events, acres completed, educational events, etc.
- What was accomplished with the funds expended for the reporting period
- A comparison of actual accomplishments with goals and objectives
- Reasons why established goals were not met (if applicable)
- Any changes Truckee Meadows Fire Protection District plans to propose (if applicable)
- Other pertinent information such as an analysis of cost overruns or high unit costs

Truckee Meadows Fire Protection District will also be required to submit Financial Explanation Reports with each Request For Reimbursement (RFR). These progress reports will explain what the funds were used for and how the costs contributed to the deliverables of the grant. Detailed Time & Effort logs will need to be submitted for any expenses claimed under Personnel/Labor in accordance with 2 CFR 200.430.

Milestones:

Fuels mitigation work should begin in the Spring of 2026.

All fuels mitigation work should be completed by the Fall of 2027, including pre-emergent herbicide.

All project work and events should be completed prior to 09/30/2028

Truckee Meadows Fire Protection District will provide a final project report and RFR to NDF no later than 10/15/2028.

Measurements of project success:

All necessary historical and environmental clearances obtained prior to implementation of project. All 116.2 acres treated on private property under the Arrowcreek Homeowner Association and the Club at Arrowcreek Golf Club, at a 50-75% reduction to native brush fuel loading. Removal of decadent brush, selection of dead or unhealthy plants. Materials removed will be chipped or masticated back on site either via tracked chipper, wheeled chipper or mastication implement. If indicated by either observed germination or sprouting on more than 25% of treated areas, pre-emergent herbicide will be applied. All associated costs are at or below the subaward obligation amount of \$284,220. All quarterly performance reports, financial explanation reports, and request for reimbursements are
