|   | Explanation: Overassessment due to factual error. Original assessment was based off limited information due to unsuccessful attempts to arrange a site visit with the property owner. This resulted in having to rely on a limited exterior site inspection conducted on 5/16/2024 and the building plans. On 8/19/2024, the property owner called concerned with the increased value, at which time a site visit was scheduled. The site visit was conducted on 8/23/2024, which revealed the extent of the project to be less extensive than originally determined and the project to be only 70% complete as of 7/1/2024. As a result, the improvements and new construction values are reduced. |                            |                  |                     |              |               | Personal Property | 0                | 0                | 0                | 0        |
