SECTION B

Scope of Work for: Subrecipient

Northern Nevada Public Health (previously Washoe County Health District), hereinafter referred to as Subrecipient, agrees to provide the following services and reports according to the identified timeframes:

Project #1 - STI

Description of Services, Scope of Work and Deliverables

To address the syndemics of STIs and HIV in Washoe County (WC), a fully funded STI/HIV DIS workforce is needed. Reportable STIs continue to represent a high burden of disease in WC. Co-infections between PLHIV and those who have acquired STIs are a significant public health concern, particularly with syphilis. In addition, the rise in congenital syphilis cases has led to a prioritized response. With the great number of annual cases and the expected increase when people seek services following COVID restrictions being released, it is critical to have an adequate, fully funded workforce available to conduct evidence-based, public health interventions. The number of STI cases, especially gonorrhea and syphilis, cannot be adequately addressed with the current funding. In addition, staff duties related to increasing appropriate data reporting and community engagement with providers have been hampered by competing priorities.

Northern Nevada Public Health will provide STI surveillance and disease investigation services to Washoe County residents and healthcare providers. These services include, Partner Services (contact tracing), prioritized investigations, and education to clients and providers on following the current CDC STI Treatment Guidelines.

Goal 1: Conduct STI surveillance, reporting, and identification of chlamydia, gonorrhea, syphilis and congenital syphilis, and adverse outcomes of STIs.
