

Truckee Meadows Fire & Rescue

Monthly Report

Board of Fire Commissioners Meeting July 2026

May 2026 Fire Prevention Statistics

Public Education Events: 13

Reached approximately 500 people.

These are events such as school visits, educational events, and parades.

Annual and Initial Business License Inspections: 40

These inspections are regulatory procedures designed to ensure businesses comply with safety, health, and zoning regulations to protect public safety and maintain legal operating standards.

Pre-Development Reviews: 5

An early-stage high-level assessment of a proposed project by county departments or experts before formal application submission. These types of reviews can help identify issues, reduce risk, identify high-cost requirements and help accelerate formal approvals.

Fire Investigations: 2

A process of determining the origin, cause, and development of a fire. It involves examining fire scenes, collecting evidence, and analyzing patterns to understand how and why a fire started and how it spread.

New Construction Building Reviews: 108

These reviews are a comprehensive assessment of building plans or on-site work to ensure compliance with safety codes, zoning regulations, and design standards before or during construction.

New Construction Inspection: 78

An official review is conducted to ensure that a newly built building complies with all applicable fire safety codes and regulations before it can be occupied.

New Fire and Life Safety Systems Reviews: 26

These reviews are comprehensive, proactive assessments of building construction documents, fire protection systems, and safety features conducted to ensure compliance with adopted codes (e.g., NFPA, IFC) and standards before construction or modification begins.
