

Truckee Meadows Fire & Rescue

North Valleys CAB

August 10, 2026 Meeting

June Statistics

Incident Total: 428

Each new incident is assigned a unique identifier. The statistics below reflect the number of incidents TMFR responded to within your CAB (regardless of jurisdiction).

Incident Count

428

Daily Average

14.27

*Unit Responses

567

Daily Average

18.90

*Many incidents require multiple resources to respond to the scene. **Unit Responses** reflects every unit response to an incident.

Example: A fire incident dispatches 3 Engines, 1 Ladder Truck, 1 Ambulance, and 2 Battalion Chiefs = 7 unit response.

Safety Tips & Updates

Evacuation Preparedness *find more at www.ready.gov*

- **Know more than one way out.** Identify your primary evacuation route and at least one secondary route in case roads become blocked/congested. Drive them so they're familiar to you.
- **Leave early, not at the last minute.** If an evacuation warning is issued, leaving early helps you avoid heavy traffic and gives first responders room to work.
- **Keep a "go bag" ready** with medications, important documents, chargers, flashlights, water, snacks, pet supplies, and a change of clothes so you can leave in minutes.
- **Stay connected.** Help communicate with public safety by signing up at www.smart911.com
- **Have a family communication plan.** Decide on a meeting place, who you'll contact if separated, and don't forget to include pets in your evacuation plan.

Water Safety at the Lake *find more at www.cdc.gov/drowning/prevention/*

- **Wear a life jacket.** Even experienced swimmers can be caught off guard by cold water, strong currents, or unexpected falls. A properly fitted life jacket saves lives.
- **Cold water is colder than you think.** Northern Nevada lakes and rivers can remain dangerously cold well into summer, increasing the risk of shock and exhaustion.
- **Never swim alone.** Use the buddy system and keep children within arm's reach around the water.
- **Keep boating sober.** Alcohol and water don't mix. Impairment slows reaction time, affects judgment, and increases the risk of drowning.
- **Check conditions before you go.** Weather, winds, currents, and water levels can change quickly. Know the forecast and have a plan before heading out.
