hereby make(s) application for permission to change the

☒ Point of diversion☒ Place of use☒ Manner of use☐ of a portion

of water heretofore appropriated under (Identify existing rights by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and identify right in Decree.)

Permit 19883, Certificate 6229, water right formerly under Claim 643 of the Truckee River Decree.

1. The source of water is Truckee River

Name of stream, lake, underground, spring or other sources.

2. The amount of water to be changed 1.23 cfs but not to exceed 130 AF

Second feet, acre-feet. One second foot equals 448.83 gallons per minute.

3. The water to be used for Wildlife (Return Flow)

Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use

4. The water heretofore used for Industrial

If for stock, state number and kind of animals.

5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated.)

The water will remain in stream within the limits of the natural bed and banks of the Truckee River from Steamboat Canal, which is located within the NE 1/4 SW 1/4 of Section 31, T.19N., R.18E., M.D.B.M., or at point from which the SE corner of said Section 31 bears S.62°04'E., a distance of 3,195.00' to the Vista USGS gauging station.

6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)

The existing point of diversion is located in the NE 1/4 NW 1/4 Section 33, T.20N. R.22E. MDM, Storey County, Nevada, from which point the W 1/4 corner of said Section 33 bears South 40° 39' west 3395.0 feet.

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

Water changed under this application will remain in the Truckee River from Steamboat Canal, which is located within the NE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 31, T.19N., R.18E., M.D.B.M., or at point from which the SE corner of said Section 31 bears S.62°04'E., a distance of 3,195.00' to the Vista USGS gauging station.

See map in support of Application 67182, filed February 2, 2001.

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

The existing place of use is NE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 33, T.20N, R. 22E, M.D.B.M. See map in support of Application 19883, filed on June 2, 1961.

9. Proposed use will be from As Decreed to As Decreed of each year.
Month and Day Month and Day

10. Existing use permitted from As Decreed to As Decreed of each year.
Month and Day Month and Day

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

There are no works of diversion as the water will remain instream for instream flow purposes.

12. Estimated cost of works NA

13. Estimated time required to construct works NA

If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use NA

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Please refer to Exhibit A attached hereto.

16. Miscellaneous remarks:

This application is filed in respect to the agreement, fully executed, on June 29, 2022, between Truckee Meadows Water Authority and Sierra Pacific Power Company d/b/a NV Energy. See Permit 93131T for the fully executed agreement.

Exhibit A

The purpose of this Application is to provide return flow in the Truckee River at the Vista Gage equivalent to treated effluent from the Truckee Meadows Water Reclamation Facility (TMWRF) that is delivered to treated effluent reuse customers, pursuant to secondary permits issued for the use of the surface water component of treated effluent granted under Permit No. 29973.

Water under this Application will be used to provide return flow related to effluent reuse by existing and future customers. As the original decreed point of diversion is below Vista Gage the entire amount of this water right 1,400 AF will be available for return flow purposes as allowed under the Truckee River Operating Agreement. This application would move the point of diversion up to Steamboat Canal, where it would have been diverted for other purposes. However, as noted, the water will remain in the Truckee River.

This application is to ensure that there is no less water than would be present at the Vista Gage had the treated effluent been discharged to the Truckee River and not been delivered to the effluent customers. The surface water component of the secondary under Permit No. 29973 will be limited to the total of all similar applications granted by the State Engineer.
